Nexus AI Studio — Comprehensive Business Plan

1. Company Overview

Mission

Nexus AI Studio empowers creators, marketers, and enterprises to harness the full potential of generative AI without vendor lock-in, providing a unified platform where the best models compete on merit, not ecosystem lock.

Vision (3-Year)

Become the **default operating system** for AI-powered content creation—trusted by 100K+ creators and enterprises to manage $500M+ in annual AI spending.

Core Values

- **Creator-First**: Build for those who create, not corporations
- **Transparency**: Show costs, model performance, and choices clearly
- **Openness**: Multi-provider architecture, no proprietary lock-in
- **Privacy**: User data is sacred, never trained on without consent
- **Excellence**: Maintain highest standards for UX, performance, security

---

2. Organization Structure

Current (Founder Stage)

```
CEO/Founder (Christopher Scannell)
├── Product & Engineering
├── Operations
└── Customer Success (outsourced)
```

Post-Seed (6 months in)

```
CEO
├── VP Engineering
│   ├── AI/Product Lead
│   └── Full-Stack Engineer
├── VP Sales & Marketing
│   ├── Sales Manager
│   └── Content/Community Manager
└── Operations
    ├── Finance/Accounting
    └── HR/Admin
```

Year 2 Structure

```
CEO
├── VP Engineering
```

```
│   ├── AI/ML Team (3 engineers)
│   ├── Full-Stack Team (2 engineers)
│   └── DevOps/Infrastructure
├── VP Product & Design
│   ├── Product Manager
│   └── Design Lead
├── VP Sales & Customer Success
│   ├── Enterprise Sales (2 AEs)
│   ├── SMB Sales Manager
│   └── Customer Success Manager
└── Chief Financial Officer
    ├── Finance/Accounting
    └── HR/Operations
```

---

3. Products & Services

Core Product: Nexus Platform

Tier 1: Free

- **Price**: $0
- **Features**: Chat gear (local LLM), 50 requests/day, read-only library
- **Users**: Students, hobbyists, evaluators
- **Conversion Rate**: 2-3% to Pro within 30 days

Tier 2: Pro

- **Price**: $29/month
- **Features**: All creation gears, 5K requests/month, API access (100 req/day)
- **Users**: Freelancers, small teams, content creators
- **Conversion Rate**: 10-15% upgrade to Studio
- **Annual**: $348 (with 15% annual discount option = $296/year)

Tier 3: Studio

- **Price**: $99/month
- **Features**: Unlimited requests, team collaboration (5 users), webhooks, analytics
- **Users**: Agencies, small brands, content studios
- **Conversion Rate**: 20% upgrade to Enterprise
- **Annual**: $1,188 (with 20% annual discount = $950/year)

Tier 4: Enterprise

- **Price**: Custom ($5K-$50K/month)
- **Features**: Dedicated account manager, SLA, SSO/SAML, audit logs, data residency, custom integrations

- **Users**: Fortune 1000, large agencies, media companies
- **Contract Length**: 1-3 years (annual commitment)

Secondary Products (Roadmap)

Fine-Tuning Workbench (Q4 2026)

- **Price**: $200-$2K/month per branded model
- **Target**: Enterprises wanting custom trained models
- **Revenue Potential**: $50K+/month from 20-30 enterprise customers

White-Label Platform (Q1 2027)

- **Price**: $5K-$10K/month + % of end-user revenue
- **Target**: Agencies, resellers, content platforms
- **Revenue Potential**: $100K+/month from 10-15 partners

Compliance Workbench (Q2 2027)

- **Price**: Add-on $300/month on top of Enterprise
- **Features**: HIPAA, SOC2, GDPR compliance dashboards
- **Target**: Healthcare, finance, regulated industries
- **Revenue Potential**: $30K+/month

---

4. Marketing & Sales Strategy

Marketing Funnel

Awareness (Top of Funnel)

Channel
Twitter/X
ProductHunt
Reddit
YouTube (SEO)
LinkedIn
Total

Consideration (Middle of Funnel)

- Email nurture (free → Pro): 5-7 day onboarding sequence
- In-app tutorials & feature gating
- Case studies & comparison guides
- Community Discord (1K+ members target)
- **Target Conversion**: 2-3% free → Pro

Decision (Bottom of Funnel)

- Product demo videos (optimized for each persona)

- Sales consultation calendar (enterprise/studio)
- 14-day free trial for Studio features
- ROI calculator (vs current tool spend)
- **Target Conversion**: 10-15% Studio, 20% Enterprise from qualified leads

Sales Strategy

Free to Pro ($29/month)

- **Owner**: Product (in-app)
- **Motion**: Automated email + feature gates
- **Target**: 2-3% conversion
- **ARR per converter**: $348

Pro to Studio ($99/month)

- **Owner**: Product + Customer Success
- **Motion**: In-app upsell + outreach (at 30-day mark)
- **Target**: 10-15% conversion
- **ARR per converter**: $1,188
- **Expansion**: +$500/year per customer (add-ons, usage)

SMB/Agency Direct Sales ($99-$500/month)

- **Owner**: Sales Manager (hiring month 2-3)
- **Motion**: LinkedIn outreach, webinars, agency partnerships
- **Target**: 5-10 leads/month, 20% close rate = 1-2 new customers/month
- **ARR per customer**: $3K-$6K

Enterprise Sales ($5K-$50K/month)

- **Owner**: VP Sales (hiring, external sales consultant initially)
- **Motion**: Warm introductions, industry events, reseller channels
- **Sales Cycle**: 60-120 days
- **Target**: 1 contract/quarter (year 1), 1/month (year 2)
- **ARR per customer**: $60K-$600K

Partner Channels

Agency Partners

- **Program**: 20-30% margin, white-label branding, co-marketing
- **Target**: 50 agencies by end of year 2
- **Potential**: $5K-$20K MRR per partner

Reseller/Integration Partners

- **Program**: Zapier, Make.com, HubSpot app marketplace
- **Revenue Share**: 20-30% per transaction

- **Target**: Launch 5 major integrations in year 1
- **Potential**: $10K-$30K MRR

---

5. Financial Projections (36 Months)

Revenue Model Assumptions

Free → Pro Conversion

- Monthly free user acquisitions: 2,000
- 30-day trial activation: 30%
- 30-day to Pro conversion: 3%
- Monthly new Pro: 2,000 × 0.3 × 0.03 = 18 customers/month
- Starting month 6: 2,500/month free → 22 Pro customers/month

Pro → Studio Upsell

- Starting Pro base: 20 customers (month 3)
- Monthly upsell rate: 12%
- Monthly Studio from upsell: 20 × 0.12 = 2.4 → 3 customers/month
- By month 12: Pro base 200 → 24 Studio/month from upsell

Enterprise

- Month 6: 1 pilot customer ($15K MRR)
- Month 12: 2 additional contracts ($20K MRR additional)
- Month 18: 3 additional contracts ($45K MRR additional)
- Month 24: 2 additional contracts ($80K MRR additional)

36-Month Revenue Forecast

Month	Free Users
1	2,000
3	6,500
6	12,000
9	18,500
12	24,000
15	32,000
18	40,000
24	60,000
30	85,000
36	120,000

Gross Margin Progression

Period

Year 1
Year 2
Year 3

Note: Margin improvement as fixed costs (R&D, Sales) scale across larger revenue base

Operating Expense Budget (36 Months)

Year 1 (Seed-funded)

Category
Salaries (founder, 2 hires)
Contractors & Consultants
Cloud Infra & GPU
Marketing & Partnerships
Legal, Finance, Ops
TOTAL

Year 2 (Post-Seed, Series A prep)

Category
Salaries (8 FTE)
Contractors & Consultants
Cloud Infra & GPU
Marketing & Partnerships
Legal, Finance, Ops
TOTAL

Year 3 (Post-Series A)

Category
Salaries (18 FTE)
Contractors & Consultants
Cloud Infra & GPU
Marketing & Partnerships
Legal, Finance, Ops
TOTAL

Path to Profitability

Metric
Cash flow positive (MRR > OpEx)
Cumulative break-even

$50K MRR
$100K MRR
$500K MRR

6. Key Performance Indicators (KPIs)

Growth Metrics

- **Monthly Active Users (MAU)**: Target 40K by month 18
- **Free → Pro Conversion**: Target 3% (cohort-based)
- **Pro → Studio Upgrade Rate**: Target 12% (cohort-based)
- **Enterprise Pipeline**: Target $150K in signed contracts by month 12

Retention & Churn

- **Pro Churn**: Target ≤ 5% monthly (cohort-based)
- **Studio Churn**: Target ≤ 3% monthly (cohort-based)
- **Enterprise Churn**: Target 0% (annual contracts)
- **CAC Payback**: < 3 months for Pro, < 6 months for Studio

Engagement

- **Daily Active Users (DAU)**: 40% of MAU
- **Feature Usage**: >3 different gears per week (active users)
- **API Usage**: 50%+ of Pro users leverage API
- **Avg Session Duration**: 15+ minutes

Financial

- **Magic Number**: (MRR growth × 3) / previous month OpEx → Target >1.0 by month 12
- **Gross Margin**: 50% year 1, 70% year 2, 75% year 3
- **Burn Rate**: $34K/month (year 1), declining to profitability month 16
- **CAC**: $8 (organic), $15 (paid), blended $10

---

7. Competitive Analysis

Market Dynamics

Incumbent Players (strong in single domain) - MidJourney: Best-in-class image quality, but image-only, expensive, closed - Runway: Industry-leading video, but single provider, high cost, no desktop - Leonardo AI: Cost-effective, but limited video, no enterprise features

API-First Players (fragmented developer experience) - Replicate: Great for developers, but high latency, no UI, learning curve - Modal: GPU infrastructure provider, not end-user platform

Advantage: Nexus 1. **Multi-provider routing** = lower cost, better availability 2. **Unified UX** = no tool switching, faster creative iteration 3. **Desktop + Web** = work anywhere, flexible deployment 4. **Enterprise-ready** = audit logs, SSO, SLA, compliance 5. **Open ecosystem** = API-first, Zapier, integrations

---

8. Risk Management

Market Risks

Risk	Likelihood	Impact	Mitigation
Tech giants enter space (Google, OpenAI)	Low	Very High	Focus on multi-provider niche, UX differentiation, rapid M&A exit option
Model pricing collapses faster than expected	Medium	Medium	Lock rates with Modal, maintain margins via premium features
Regulatory backlash on AI-generated content	Medium	High	Transparency features, copyright safeguards, compliance workbench

Operational Risks

Risk	Likelihood	Impact	Mitigation
Key engineer departure	High	High	Equity vesting over 4 years, retention bonuses, technical documentation
Model API breaking changes	Medium	Medium	2-week abstraction layer update, monitor provider changelogs
Scaling database/infra costs	Medium	Medium	Architect for multi-region from day 1, optimize caching

Financial Risks

Risk	Likelihood	Impact	Mitigation

Runway depletion before profitability	Low	Very High	Conservative burn, hit Series A milestones, bridge financing
Customer acquisition costs exceed model	Medium	High	Organic growth focus, referral program, product-led growth

9. Exit Strategy & Long-Term Vision

Scenarios

Scenario A: Sustained Independence (Base Case)

- **Timeline**: Year 3-5
- **Outcome**: $10M+ ARR, profitable, sustainable business
- **Rationale**: Defend against acquisitions, build category leader

Scenario B: Strategic Acquisition (25% probability)

- **Acquirers**: OpenAI, Google, Anthropic, Adobe, Canva
- **Timing**: Year 2-3 (post-Series A, $100M+ valuation)
- **Rationale**: Team, user base, multi-provider moat
- **Outcome**: $100M-$500M deal

Scenario C: IPO (5% probability, long-tail)

- **Timeline**: Year 5+
- **Outcome**: Public company, $1B+ valuation
- **Rationale**: Build multi-billion dollar category, prove 50%+ growth at scale

Primary Path: Maximize for Independence

- Build defensible business through product excellence
- Scale to $10M+ ARR organically
- Retain optionality for strategic acquisition

---

10. Implementation Timeline

Months 1-3 (Seed funding)

- ✓ Close seed round ($500K)
- ☐ Hire VP Engineering / AI Lead
- ☐ Stabilize core product

- ☐ Launch referral program

Months 4-6 (Product-Market Fit)

- ☐ Hit 5K free users, 200 Pro customers
- ☐ Secure first 5 enterprise pilots
- ☐ Ship team collaboration features
- ☐ Launch agency partner program

Months 7-12 (Sales Momentum)

- ☐ Reach 50K free users, 55 Pro customers
- ☐ Close 2 enterprise contracts
- ☐ Build 10 agency partnerships
- ☐ Achieve $44K MRR (Series A prep)

Year 2 (Series A Growth)

- ☐ Raise $2M Series A
- ☐ Scale sales team (2x AEs)
- ☐ Enter new markets (EU, APAC)
- ☐ Achieve $380K MRR

Year 3 (Market Leadership)

- ☐ 400+ Pro, 400 Studio customers
- ☐ 15 enterprise contracts
- ☐ Launch fine-tuning workbench
- ☐ Achieve $1M+ MRR

Conclusion

Nexus AI Studio addresses a clear market gap: the need for a unified, cost-transparent, multi-provider platform for generative AI creation. With a proven founder, validated product, and achievable financial projections, Nexus is positioned to capture the multi-provider era before incumbents consolidate.

We are seeking $500K in seed funding to execute this plan and build the operating system for AI-powered creation.
