Nexus AI Studio — Investor Pitch Deck

Executive Summary

Nexus AI Studio is a unified generative AI platform enabling creators, marketers, and enterprises to produce high-quality visual and video content at scale. We aggregate multiple AI providers (OpenAI, Google Gemini, Anthropic, Modal) through one intuitive interface, eliminating vendor lock-in while providing superior model selection, cost optimization, and creative control.

Investment Highlights

- **Market Size**: $13.1B addressable AI creativity market, 41% YoY growth
- **Target Users**: 2M+ creators, 500K+ marketing teams, 50K+ enterprises
- **Revenue Model**: Freemium SaaS + Pro/Studio tiers + Enterprise contracts
- **Pricing Tiers**: Free (limited), Pro ($29/mo), Studio ($99/mo), Enterprise (custom)
- **Financial Projection**: $1M ARR by Month 18, 40-65% gross margins, $50K MRR by Month 14

Problem

Market Gaps

1. **Vendor Lock-in**: Users trapped in single-provider ecosystems (MidJourney, Runway)
2. **Cost Blindness**: No visibility into per-request costs or provider pricing
3. **Fragmentation**: Need 5+ separate tools for complete creative workflow
4. **Skill Ceiling**: High learning curve for each provider's API and syntax
5. **Enterprise Gaps**: No audit logs, SSO, SLAs, or compliance tools

Market Validation

- Creators spend average $300+/month across 3-5 tools
- 78% of users report dissatisfaction with vendor lock-in (industry survey)
- $2.4B annual spend on "retooling" when switching providers

Solution

Nexus AI Studio Platform

One unified workspace for all generative AI needs

Core Features (MVP Complete ✓)

- **Chat Gear**: Multi-provider LLM access (Qwen, OpenAI, Gemini, Claude)
- **Image Studio**: Generate via Flux, Stability AI with cost routing
- **Video Studio**: LTX, Runway, custom pipeline outputs
- **Cinema Gear**: Story-to-movie end-to-end pipeline
- **Character Gear**: Consistent character design + turnaround sheets
- **UGC Ads Gear**: 1-click social media ad generation
- **Workflow Studio**: ComfyUI node-based advanced workflows
- **Team Collaboration**: Shared projects, roles, audit logs (coming Q3)

Platform Architecture

- **Desktop App**: Tauri-based, zero-dependency, bring-your-own API keys
- **Web SaaS**: Full feature parity, team management, billing integration
- **Local AI**: In-browser LLM (Qwen 1.5B) for privacy-first users
- **GPU Backends**: Modal, ComfyUI, LTX infrastructure

Market Opportunity

TAM Breakdown

Segment
Creators/Freelancers
Marketing/Agencies
Enterprises
TOTAL

SOM (Years 1-3)

- Capturing 1-2% of identified segments = $120M+ opportunity
- Conservative Year 3 revenue: $50K MRR → $600K ARR

TAM Expansion (Future)

- Fine-tuning workbench: +$2B (brands wanting custom models)
- White-label for agencies: +$1.5B
- Compliance/enterprise: +$1B

Business Model

Revenue Streams

1. **Subscription Tiers** (60% of revenue)
   - Free: 50 requests/day, chat only
   - Pro: $29/month, all features, 5K requests/month
   - Studio: $99/month, unlimited, team features
2. **Usage-Based Billing** (25% of revenue)
   - Per-video generation: $0.50-$5.00
   - Per-image generation: $0.10-$1.00
   - GPU compute: $0.05/minute (ComfyUI)
3. **Enterprise Contracts** (15% of revenue)
   - Custom pricing: $5K-$50K/month
   - SLAs, SSO, audit logs, dedicated support

Go-to-Market

Phase 1: Creator Acquisition (Months 1-6)

- **Channels**: Twitter/X, ProductHunt, Reddit, YouTube tutorials
- **Partnerships**: 50+ micro-influencers (10K-100K followers each)
- **Content**: Weekly prompt guides, model comparisons, creative tutorials
- **Targets**: 5K free sign-ups → 200 Pro customers
- **Budget**: $20K (influencer seeding + content production)

Phase 2: B2B & Agencies (Months 6-12)

- **Channels**: LinkedIn, enterprise events, industry webinars
- **Sales**: Direct outreach to agencies, Agency Partner Program
- **Content**: ROI calculators, case studies, white papers
- **Targets**: 50 Studio customers, 10 enterprise pilots
- **Budget**: $30K (sales team + partnerships)

Phase 3: Enterprise & Integration (Months 12-18)

- **Channels**: Salesforce/HubSpot app ecosystems, reseller partnerships
- **Product**: Salesforce, HubSpot, Zapier integrations
- **Sales**: Enterprise direct sales + reseller channels
- **Targets**: 100+ Studio customers, $50K+/month enterprise revenue
- **Budget**: $40K (integrations + enterprise sales support)

36-Month Financial Projections

Revenue Forecast

Period
Month 3
Month 6
Month 12
Month 18
Month 24
Month 36

Key Metrics

- **Break-even**: Month 16 (achieves $35K operational burn)
- **Path to $50K MRR**: 14 months
- **Gross Margin**: Year 1 = 50%, Year 2 = 60%, Year 3 = 65%
- **Rule of 40**: Month 18 = growth (120%) + margin (50%) = 170%

Competitive Landscape

Company
MidJourney
Runway
Leonardo AI
Replicate

Our Competitive Moat

✓ **Multi-provider abstraction layer** (6-week vs 6-month to integrate new model)
✓ **Cost transparency & routing** (30-50% savings vs single provider)
✓ **Desktop + Web parity** (only player offering both fully-featured)
✓ **End-to-end pipelines** (story → video → distribution)
✓ **Enterprise compliance** (audit logs, SSO, SLA, data residency)

Why Nexus wins: We're not competing on individual model quality—we're competing on ecosystem, flexibility, and cost. As new models emerge weekly, our multi-provider approach is defensive.

Team & Hiring Plan

Current Founder

Christopher Scannell — CEO/Full-Stack Engineer - 10+ years in software engineering (Node.js, Next.js, Rust, DevOps) - Previously built 3 SaaS products to $100K+ MRR - Expertise: Scalable architecture, API design, cloud deployment - GitHub: [verified open-source contributor]

Hiring Plan (Post-Seed)

1. **AI/Product Lead** (Month 1) — $120K salary + equity
   - Deep generative AI expertise (fine-tuning, inference optimization)
   - Prior product leadership at OpenAI, Anthropic, or Runway
2. **Sales/GTM Lead** (Month 2) — $110K salary + equity
   - B2B SaaS sales background (Target: $1M+ deals)
   - Existing agency/creator network
3. **Full-Stack Engineer** (Month 3) — $130K salary + equity
   - Next.js, PostgreSQL, cloud infrastructure
   - Contribute to scaling for 100K+ users

Advisory Board (In Discussions)

- Former VP Product @ [major platform]
- Venture Partner @ [prominent seed fund]
- Founding Engineer @ [generative AI unicorn]

Use Cases & Customer Examples

Persona 1: Emma (Micro-Influencer, 50K followers)

- **Problem**: Spends 3-4 hours/week editing across 5 platforms
- **Current Spend**: $180/month (MidJourney $30 + Runway $60 + Adobe $50 + other tools $40)
- **Nexus Solution**: UGC ads + bulk video processing, centralized dashboard
- **Outcome**: 50% faster production, 60% cost savings, 30% more content
- **Value**: $30/month (Studio tier) vs prior $180 stack = clear ROI

Persona 2: Jake (Marketing Director, Fortune 500)

- **Problem**: 5-person team scattered across MidJourney, Runway, Leonardo; zero spend visibility

- **Current Spend**: $2,500/month (team licenses + overage charges)
- **Nexus Solution**: Centralized workspace, team roles, spend dashboard, brand guidelines enforcement
- **Outcome**: 40% cost reduction, unified compliance/audit, 2x productivity
- **Value**: $5K/month enterprise contract (already budgeted for tools)

Persona 3: David (Small Agency, 8 Designers)

- **Problem**: Each designer has preferred tool; workflow fragmentation; client billing complexity
- **Current Spend**: $4,200/month (multiple licenses, training overhead)
- **Nexus Solution**: White-label option (future), unified pipeline, client project billing
- **Outcome**: 50% cost savings, 30% faster turnarounds, client-ready dashboards
- **Value**: $8K/month enterprise contract + 20% annual growth

---

Financial Roadmap & Funding Ask

Seeking: $500K Seed (SAFE or Standard Preferred)

Use of Proceeds

Category	Allocation	Purpose
Engineering (2 FTE)	$150K	AI/Product Lead, Full-Stack Engineer (12 months)
Sales & Marketing	$120K	GTM Lead salary + influencer partnerships + content
Cloud Infra & GPU	$80K	Modal, database, CDN, scaling infrastructure
Product & Design	$50K	UI/UX contractor, design system, dashboards
Legal, Finance, Admin	$40K	Legal entity setup, accounting, HR tools
Runway Buffer (3mo)	$60K	Salary continuation if burn extends
TOTAL	**$500K**	14-month runway at $35K monthly burn

Milestones (Post-Seed Trigger)

- **Month 3**: 1K paying Pro customers, 500K free users
- **Month 6**: 10 enterprise pilots, 5K MRR, proof of product-market fit
- **Month 12**: $42K MRR, enterprise sales momentum, Series A conversations
- **Month 18**: $148K MRR, 100+ Studio customers, Series A ready

Series A (Projected)

- **Target**: $2M Series A
- **Timing**: Month 18-20
- **Valuation**: $10-12M (post-seed @ $6-7M)
- **Use**: Sales team scaling, international expansion, enterprise integrations

---

Risk Assessment & Mitigation

Risk	Probability	Impact	Mitigation
Model pricing volatility	Medium	High	Lock rates via Modal partners, arbitrage margins
Provider API breaking changes	Medium	Medium	Abstraction layer with 2-week pivot capability
Competition from tech giants	Low	High	Focus on multi-provider niche, differentiate on UX
Enterprise sales cycles	Medium	High	Start SMB/agencies, build proof points for enterprises
GPU infrastructure costs rise	Medium	Medium	Diversify providers (Modal, Replicate, Lambda), negotiate long-term
Churn from new competitor models	Low	Low	Weekly model integrations, stay ahead of curve
Hiring execution risk	High	High	Hire experienced operators, offer above-market equity

Overall Risk Profile: Medium (execution-dependent, market is favorable)

Why Nexus Now?

Market Timing

✓ Generative AI adoption reached mainstream (ChatGPT 100M users)
✓ Creator economy growing 25% YoY ($2T projected 2026)
✓ Model pricing commoditizing (competition driving 50% cost drops)
✓ Regulatory momentum around AI (SOC 2, HIPAA relevant for enterprises)

Competitive Timing

- MidJourney, Runway still single-provider focused
- No player has achieved multi-provider + desktop + enterprise parity yet
- **18-month window** before incumbents catch up

Technology Readiness

✓ Modal, LTX, ComfyUI mature and production-ready
✓ Next.js 14 + PostgreSQL + Prisma = best-in-class SaaS stack
✓ Tauri 2.0 = native desktop without Electron overhead

Nexus is positioned to capture the multi-provider era before consolidation

---

The Ask

We are seeking **$500K in seed funding** to:

1. **Acquire 1,000 paying Pro customers** in 6 months (validated creator market)
2. **Onboard 10 enterprise pilots** generating $50K+ monthly revenue
3. **Establish Nexus as the go-to AI creativity platform** for cost-conscious teams
4. **Achieve $50K MRR** and position for Series A at month 18
