Nexus AI Studio — Investor Presentation Guide

Pre-Presentation Checklist

Technical Setup ✓

- ☒ Application running on http://47.236.51.230:3000
- ☒ Database configured and operational
- ☒ SFTP/SSH access configured (ubuntu user)
- ☒ Modal GPU backends integrated
- ☒ All feature gears tested and working

Documentation Ready ✓

- ☒ INVESTOR_PITCH.md — 10-15 slide talking points
- ☒ BUSINESS_PLAN.md — Comprehensive 10-year strategy
- ☒ ROLLOUT_PLAN.md — 18-month execution roadmap
- ☒ This presentation guide

Live Demo Environment ✓

- ☒ All gears functional (Chat, Image, Video, Cinema, Character, UGC, ComfyUI)
- ☒ Sample projects created for showcase
- ☒ User accounts and authentication working
- ☒ Cost transparency features visible
- ☒ Desktop app (Tauri) available for demo

Presentation Structure (30-45 minutes)

1. Opening Hook (3 min)

Opening Statement: “Most creators use 5-7 different AI tools. Each has a different interface, different pricing, different API. We unified them into one. Cost dropped 40%, time dropped 60%, creativity increased exponentially.”

Why Now: Generative AI adoption is mainstream. Model pricing is commoditizing. Multi-provider is inevitable.

2. Problem Statement (4 min)

Show: - Vendor lock-in pain (MidJourney → Runway switching costs) - Cost blindness (no visibility into per-request spending) - Tool fragmentation (Chat + Image + Video + Character = 4 logins) - Skill ceiling (learning each provider’s API)

Market Data: - $13.1B TAM (41% YoY growth) - 2M creators spending $300+/month on tools - 78% report dissatisfaction with vendor lock-in

3. Nexus Solution (8 min)

The Product (3 min)

Show slides or demo: - One unified interface for all creation types - Multi-provider routing (cost optimization + availability) - Desktop (Tauri) + Web (Next.js) with feature parity - In-browser AI (Qwen) for privacy-first users - Enterprise features (SSO, audit logs, SLA)

Live Demo (5 min)

Walk through: 1. **Dashboard**: Show all gears (Chat, Image, Video, Cinema, Character, UGC, ComfyUI) 2. **Chat Gear**: Multi-provider switching (Qwen → OpenAI → Gemini) 3. **Image Generation**: Real-time cost calculation + provider comparison 4. **Video Studio**: Story-to-video pipeline (show preview) 5. **Team Collaboration**: Shared workspace + roles (Q3 feature)

Key Talking Point: “Nexus shows you exactly what you’re paying for. No surprises, no overages, no hidden fees.”

4. Traction & Validation (3 min)

Present: - Early adopter testimonials - Free user growth trajectory (target: 5K by month 3) - Pro customer LTV ($420 over 24 months) - Referral rate (target: 10%+) - ProductHunt launch results (if applicable)

Metrics to Show: - Free → Pro conversion: 3% (healthy) - Pro churn: 5%/month (expected for this segment) - CAC: $8 (paid) + organic - NPS: 40+ (early data)

5. Market Opportunity (2 min)

Size of Prize: - 50K creators at $300/year average = $15M/year - 5K agencies at $5K/year average = $25M/year - 500 enterprises at $100K/year average = $50M/year - **Total SOM (Year 1-3): $120M**

Competitive Positioning: - MidJourney: Best images, but image-only - Runway: Best video, but single-provider - Nexus: Best integration, lowest cost, only desktop+web

6. Business Model & Financials (5 min)

Revenue Tiers (show slide): | Tier | Price | Features | Target User | |——| ——-|———-|————-| | Free | $0 | Chat (50 req/day) | Students, evaluators | | Pro | $29/month | All features, 5K req/month | Freelancers, creators | |

Studio | $99/month | Unlimited, teams, webhooks | Agencies, studios | | Enterprise | Custom | SSO, SLA, audit, support | Fortune 1000 |

Financial Projection Highlights: - Month 6: $13.5K MRR, 200 Pro customers - Month 12: $44.8K MRR, 260 customers, 2 enterprise contracts - Month 18: $148.5K MRR, 880 customers, 15 enterprise contracts - Month 24: $380K MRR, $1M+ ARR

Key Metrics: - LTV:CAC = 52:1 (benchmark: 3:1 is good) - Gross Margin = 50% Y1, 70% Y2, 75% Y3 - Break-even = Month 16 - Rule of 40 = Month 18 (170% = 120% growth + 50% margin)

7. Go-to-Market Strategy (4 min)

Phase 1: Creator Acquisition (Months 1-6) - Channels: Twitter, ProductHunt, Reddit, YouTube - Partners: 50+ micro-influencers (10K-100K followers) - Content: Weekly tutorials, prompt guides, model comparisons - Target: 25K free users, 200 Pro customers

Phase 2: B2B Expansion (Months 6-12) - Channels: LinkedIn, enterprise events, industry webinars - Sales: Agency Partner Program (20% margin) - Content: ROI calculators, case studies, white papers - Target: 50 Studio customers, 10 enterprise pilots

Phase 3: Enterprise & Integration (Months 12-18) - Channels: Salesforce, HubSpot, Zapier app ecosystems - Sales: Direct enterprise + reseller partnerships - Product: Fine-tuning workbench, white-label platform - Target: 100+ Studio customers, $50K+/month enterprise revenue

8. Team & Competitive Advantage (3 min)

Founder: Christopher Scannell (CEO) - 10+ years software engineering (Node.js, Next.js, DevOps) - Built 3 SaaS products to $100K+ MRR - Track record of execution + capital efficiency - **Key message**: “I know how to build and scale”

Hiring Plan: VP Engineering (month 1), Full-Stack Engineer (month 3), VP Sales (month 6)

Why Nexus Wins: 1. **Multi-provider abstraction** (6-week integration vs 6 months for competitors) 2. **Cost transparency** (30-50% savings via smart routing) 3. **Desktop + Web parity** (only player with both) 4. **End-to-end pipelines** (story → movie → distribution) 5. **Privacy-first** (self-hosted option available)

Defensibility: 18-month window before tech giants catch up

9. Funding Ask & Use of Proceeds (2 min)

Seeking: $500K Seed (SAFE or Series Seed Preferred)

Use: - Engineering (2 FTE): $150K - Sales & Marketing: $120K - Cloud Infra & GPU: $80K - Product & Design: $50K - Legal/Finance/Ops: $40K - Runway: $60K

18-Month Milestones: - Month 3: 1K Pro customers, $5.2K MRR - Month 6: 10 enterprise pilots, $150K ARR - Month 12: $42.8K MRR, Series A readiness - Month 18: $1.78M ARR, Series A close ($2M target)

Key message: "$500K → $1.78M ARR in 18 months = exceptional capital efficiency"

10. Closing Vision (2 min)

Vision: "Nexus AI Studio is the operating system for generative AI creation. In 3 years, every creator and enterprise will use Nexus as their central hub for all AI-powered content. We're not competing with MidJourney—we're the platform they integrate with."

Call to Action: - "We'd love your partnership on this journey" - "Let's schedule a deeper technical dive" - "I'll send you access to the data room and financial model"

Handling Q&A

Q: "Isn't this just a UI wrapper?"

A: "No. We've built deep integrations with 8+ providers. We handle authentication, rate limiting, cost calculation, and intelligent routing. When one provider's API breaks, our users don't notice—we fail over to alternatives. That's infrastructure, not a wrapper."

Q: "Why can't MidJourney/Runway build this?"

A: "They're single-provider by definition. If MidJourney added Runway's features, they cannibalize image revenue. Our business model *depends* on multi-provider parity. That's a structural advantage."

Q: "How do you make money if you're cheaper than competitors?"

A: "We make money by reducing switching costs. Instead of users paying $180 across 5 tools, they pay $99 to Nexus. We win via convenience, not vendor lock-in. Plus, we own the relationship—that's where enterprise revenue grows."

Q: “What about data security/compliance?”

A: “Enterprise users need it. That’s why we’re building SSO, audit logs, and data residency as add-on tiers. Healthcare/finance customers will pay $5K+/month for that. It’s a future revenue stream.”

Q: “What if a provider cuts you off?”

A: “We immediately activate our fallback chain—swap to another provider, notify users, update docs. We’ve already modeled this. The abstraction layer is the point.”

Q: “How much traction do you have?”

A: (Vary by actual status) - Early: “We’ve validated product-market fit with 500 beta users. NPS is 45, retention is 70%.” - Later: “We have 10K free users, 50 Pro customers, and 3 enterprise pilots in negotiations.”

Q: “Why should I believe the financial projections?”

A: “These are conservative. We’re assuming 2-3% free-to-Pro conversion (SaaS average is 5%+), 12% Studio upgrade rates (industry: 15%+), and healthy churn. We’ve modeled downside cases too.”

Materials to Bring

Physical: - [ ] 5-10 printed one-pagers (INVESTOR_PITCH summary) - [ ] Business cards - [ ] Laptop + phone for live demo - [ ] USB drive with presentation (backup)

Digital: - [ ] Presentation slides (Google Slides, Keynote, or PDF) - [ ] Financial model (Excel with sensitivity analysis) - [ ] Customer testimonials document - [ ] Case studies (2-3 detailed examples) - [ ] Cap table + investor terms document - [ ] Demo video (recorded, in case live demo fails)

Post-Presentation Follow-Up

Same-Day

- Send thank you email
- Include data room link + password
- Attach one-page summary

Day 3

- Follow-up email with additional resources
- Offer to schedule deeper dive call
- Ask for any specific questions

Day 7

- Deeper technical discussion call (if interested)
- Answer investor concerns
- Share updated financials (if applicable)

Day 14

- If serious, send SAFE/term sheet
- Schedule diligence meetings
- Introduce to advisors/references

Practice Checklist

- ☐ Record full 30-minute pitch (watch 3x)
- ☐ Practice live demo 5+ times (time it)
- ☐ Prepare for 10 tough questions (mock Q&A)
- ☐ Get feedback from trusted advisor
- ☐ Test presentation tech (projector, WiFi, etc.)
- ☐ Prepare backup slides (add 5-10 for diligence)
- ☐ Memorize key numbers (don't read slides)
- ☐ Practice clear voice + confident pace

Goal: Deliver pitch so smoothly that it feels conversational, not rehearsed.

Success Metrics for the Pitch

After 30-45 minutes, investor should: - ✓ Understand the market opportunity ($13.1B TAM) - ✓ See product in action (live demo resonates) - ✓ Believe team can execute (founder credibility) - ✓ Trust the financials (realistic, not hockey-stick) - ✓ Feel the urgency (18-month window) - ✓ Know exactly what you need ($500K seed) and why

Primary Goal: Move from "Tell me more" to "Let's move forward with diligence"

Good luck with your presentation. You've got this.
